

Supporting Healthy Living for Oregonians with Chronic Disease:

Patient Self-Management Collaborative

Laura Chisholm, MPH, MCHES
Self-Management Technical Lead
Oregon Public Health Division

Irma Murauskas, BSN, MPH
Director of Primary Care Transformation
Oregon Primary Care Association

Oregon Public Health Association
October 14, 2014

Patient Self Management (SM) Collaborative

What we set out to do:

- Enhance SM support systems (patient centered interactions + service delivery) within the clinic visit
 - Motivational interviewing
 - Team-based care
- Develop + refine referral systems
 - Oregon Tobacco Quit Line
 - Living Well & Tomando Control SM workshops
 - “Closing the loop”

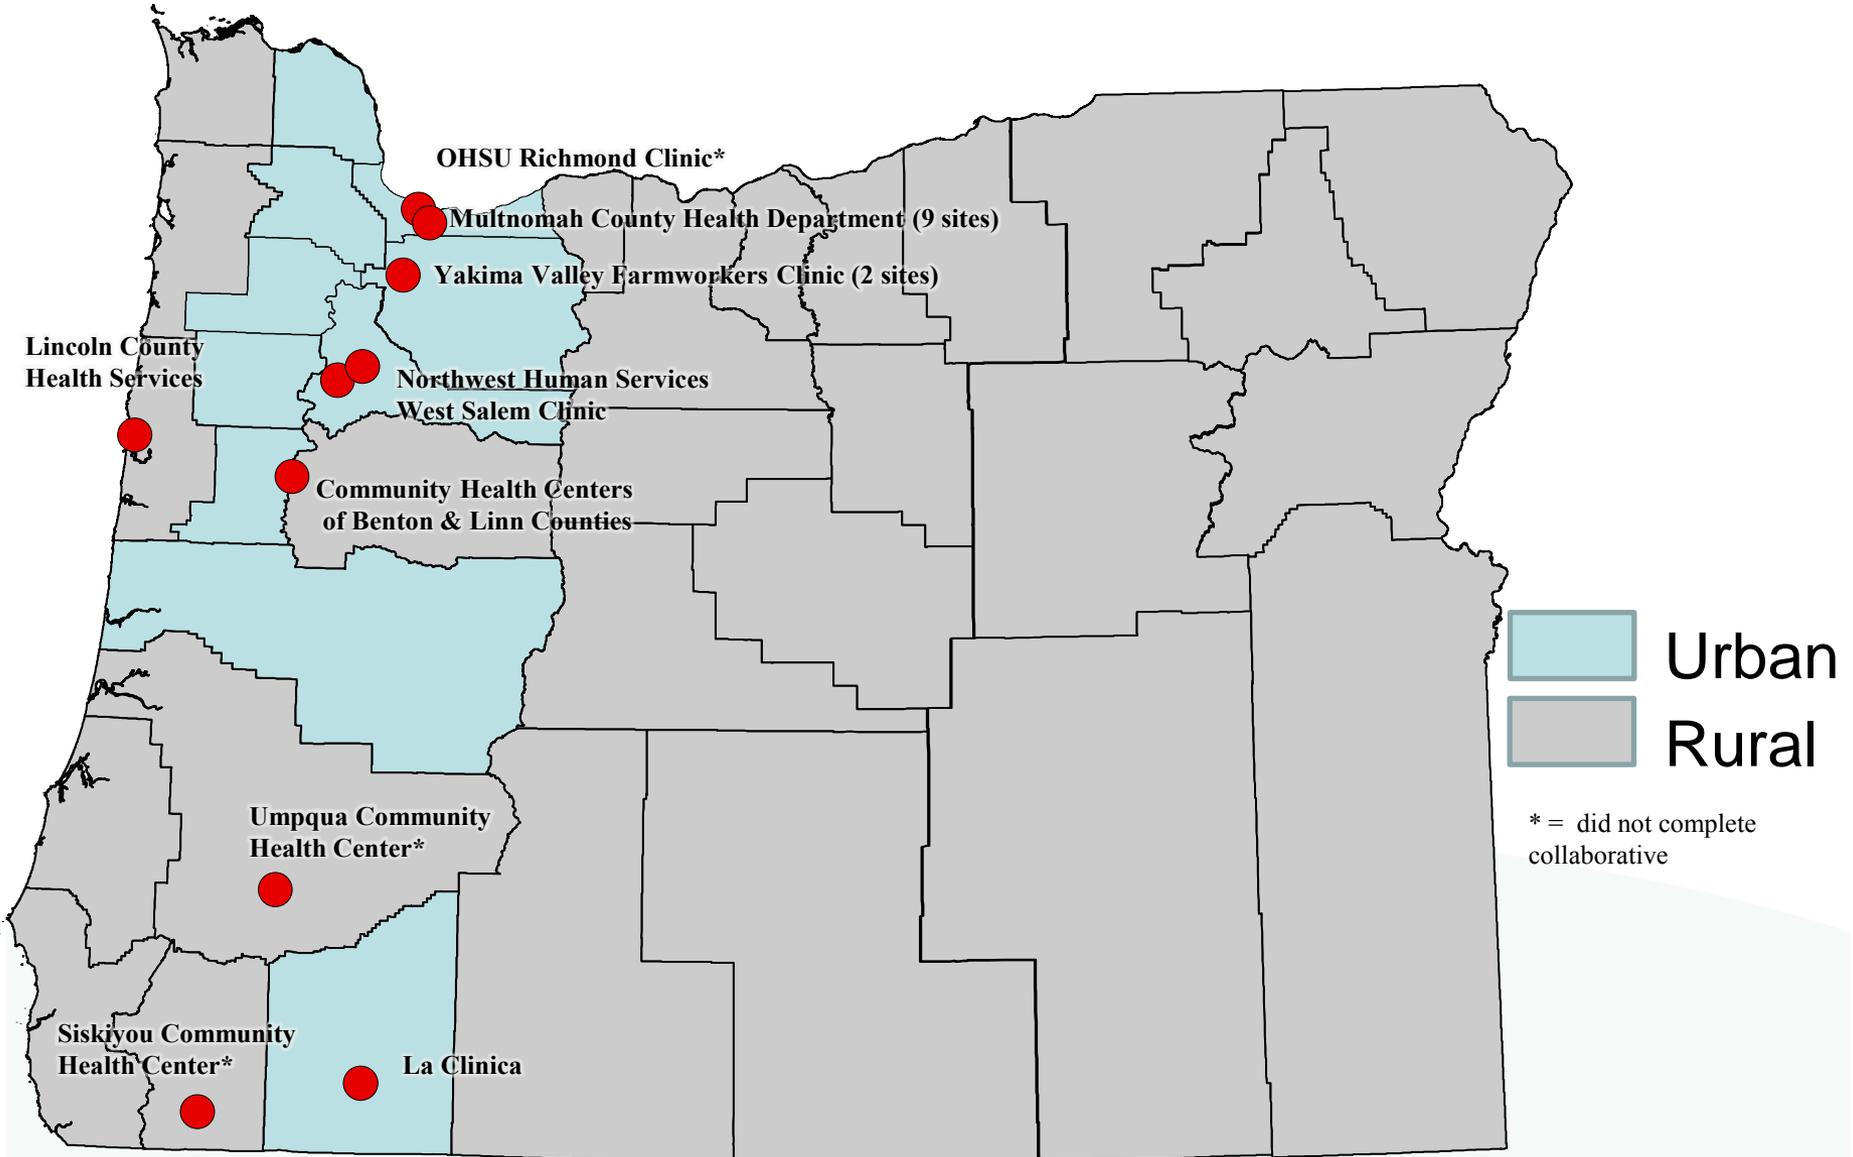

How It Worked:

- Collaborative learning model
 - Multidisciplinary clinic teams
 - Practical, interactive approach
 - Emphasis on peer /shared learning
- Clinic teams attend learning sessions (F2F + web based)
 - Motivational interviewing
 - SM resources and support skills
 - Clinical process improvement for patient-centered care and SM referral
- Measurement/metrics
 - To drive improvement + increase understanding

Patient Self-Management Collaborative – participating FQHCs

Advantages of SM Support - the Clinic Perspective:

- Empowers the patient to be in control of their own care + chronic disease
- Patients want smoking cessation and SM support
- The Quit Line and Living Well are proven interventions
- Relieves pressure on providers + clinic staff
- Fulfills Meaningful Use reporting requirements
- Supports medical home accreditation

Can it be done? Yes!

Clinic successes:

- Referral protocols + status tracking
- New electronic medical record templates (OCHIN)
- Documentation + reporting of SM data:
 - Patient goals, barriers, progress, confidence level
- Care plans that include patient goals
- Work flow changes
- More patients are getting connected to resources
- Deeper understanding of what's required on both a clinical + operational level to improve SM support systems + service delivery

So far we've learned...

It's challenging to measure success.

- What can we measure?
- What process data are meaningful?
- What clinical data are meaningful?
- How can we get consistency between different electronic record systems?
- How do we avoid clinic staff “measurement overload”?

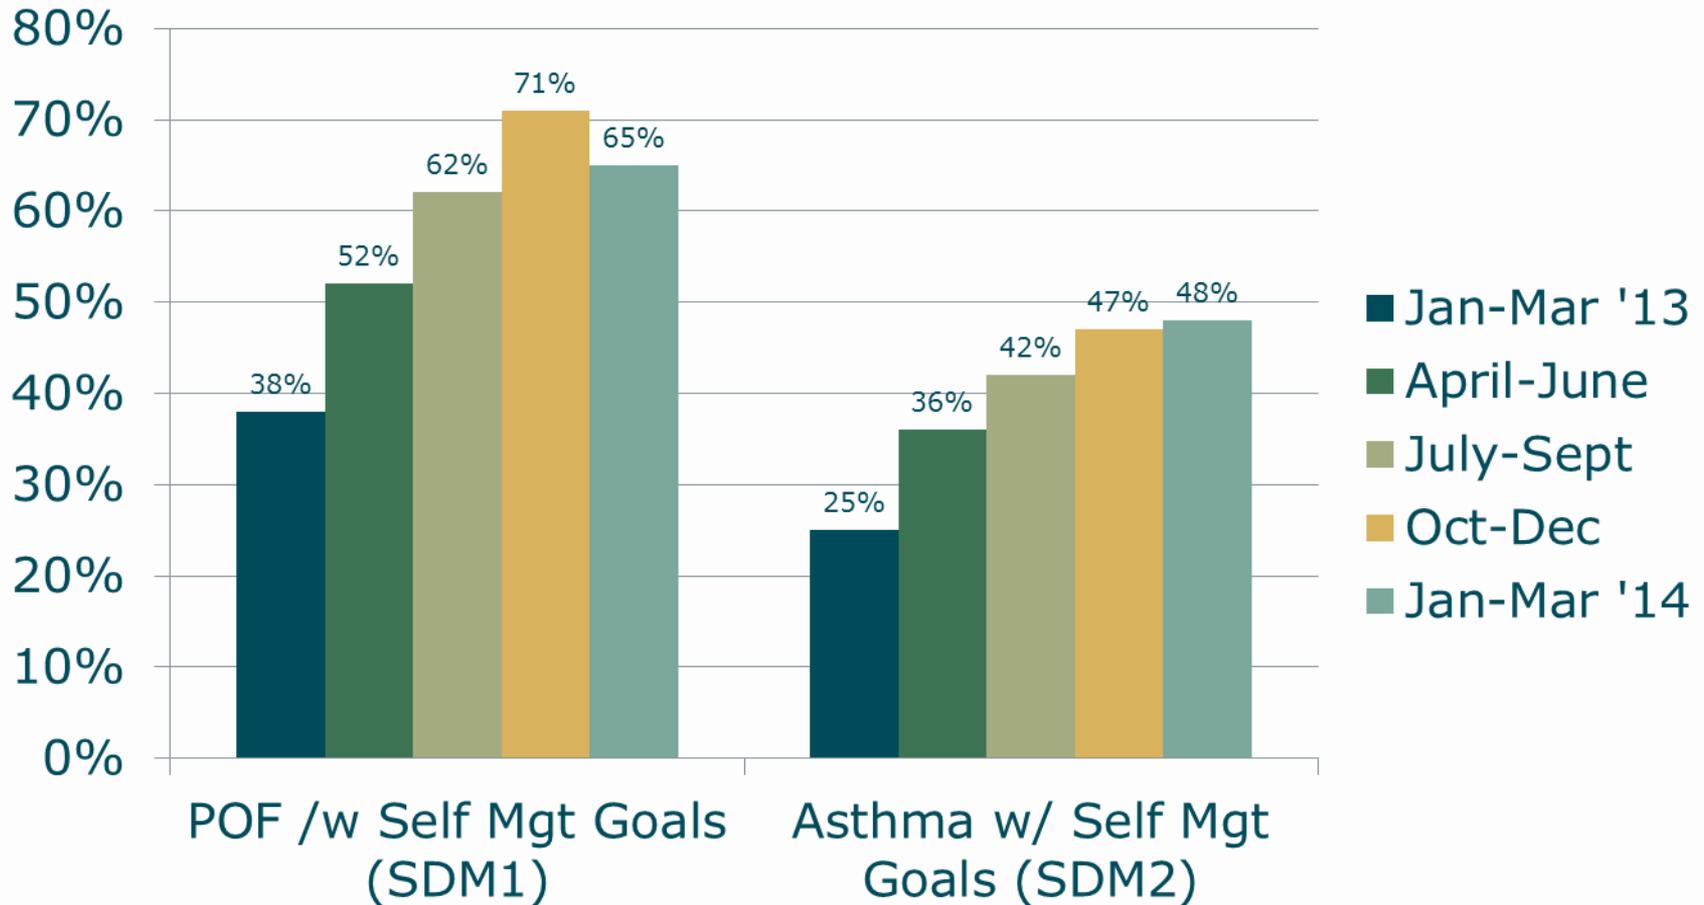

Defining + Measuring Success

- SM specific QI tool – Assessment of Primary Care Resources and Supports for Chronic Disease Self Management (PCRS), adapted with permission
- PCRS is a tool that focuses exclusively and comprehensively on SM support. It's organized into two categories: patient and organizational support
- Intention was to use this comprehensive approach as an ongoing QI tool that *hopefully* leads to improved patient and staff competence in the SM process

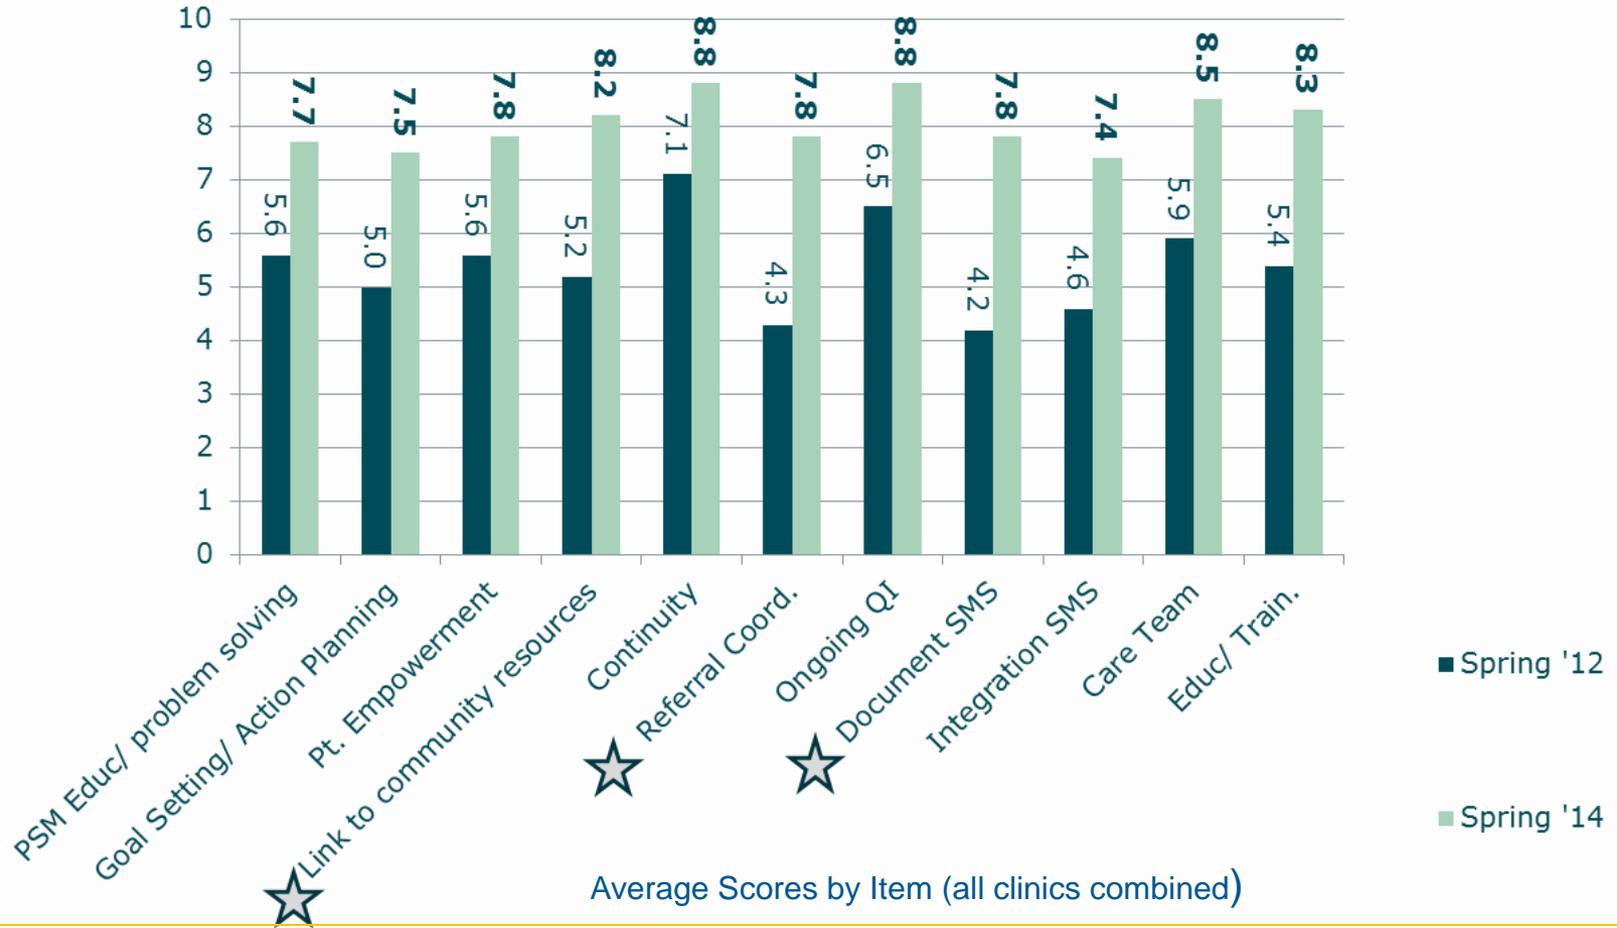

I: PATIENT SUPPORT (circle one NUMBER for each characteristic)

Characteristic	Quality Levels													
	D		C			B			A (=all of B plus these)					
3. Goal Setting/ Action Planning	...is not done	...occurs but goals are established primarily by health care team rather than developed collaboratively with patients	...is done collaboratively with all patients/ families and member(s) of their health care team; goals are specific, documented and available to any team member; goals are reviewed and modified periodically	...is an integral part of care for patients with chronic diseases; goals are systematically reassessed and discussed with patients; progress is documented in patient charts	1	2	3	4	5	6	7	8	9	10
4. Problem-Solving Skills	...are not taught or practiced with patients	...are taught and practiced sporadically or used by only a few team members	... are routinely taught and practiced using evidence-based approaches and reinforced by members of the health care team	... is an integral part of care for people with chronic diseases; takes into account family, community and environmental factors; results are documented and routinely used for planning with patients	1	2	3	4	5	6	7	8	9	10
5. Emotional Health	...is not assessed	...is not routinely assessed; screening and treatment protocols are not standardized or are nonexistent	...assessment is integrated into practice and pathways established for treatment and referral; patients are actively involved in goal setting and treatment choices; team members reinforce consistent goals	...systems are in place to assess, intervene, follow up and monitor patients' progress and coordinate among providers; standardized screening and treatment protocols are used	1	2	3	4	5	6	7	8	9	10

% of patients with documented SM goal(s) and/or update of goals within the last 6 months. N=1

Large improvements shown across all measures over the life of the project. The largest improvements are in systems for documentation of SM support services ; referral coordination; and links to community resources .

PCRS Summary by Clinic – July 2012

	D: Inadequate/ Non-existent implementation	C: Patient provider-level implementation sporadic & inconsistent	B: Team-level implementation/ Organized & consistent	NW	A: System-wide adoption & integration	YVFWC	Linc.
11. Pt Self Mgt education and problem solving skills			All 5 clinics				
12. Goal Setting/Action Planning			All 5 clinics				
13. Patient Empowerment and engagement			LCHC, NEHC, NPHC, SBHC	HIV			
14. Link to Community Resources			NPHC, SBHC	MCHD, NEHC	HIV		
II1. Continuity of Care			LCHC	SBHC	HIV, NEHC, NPHC		
II2. Coordination of referrals to Self-Mgt Programs			NPHC	HIV, SBHC	LCHC, NEHC		
II3. Ongoing Quality Improvement			SBHC	NEHC, NPHC	LCHC, HIV		
II4. Systems for Documentation of Self-Mgt Support Services			NPHC, SBHC	HIV	LCHC, NEHC		
II5. Integration of Self Mgt Support into Primary Care			NPHC, SBHC	LCHC, HIV, NEHC			
II6. Primary Care Delivery Team (Integral to Practice)			NPHC	SBHC	LCHC, NEHC	HIV	
II7. Education & Training			HIV, SBHC	LCHC, NEHC, NPHC			

PCRS Summary by Clinic – July 2014

	D: Inadequate/ Non-existent implementation	C: Patient provider-level implementation sporadic & inconsistent	B: Team-level implementation/ Organized & consistent	A: System-wide adoption & integration	Lincoln

Success!

So far we've learned...

The time is right!

- New emphasis on prevention
- Advent of medical homes and CCOs
- Shift toward outcomes-based payments
- Patient-centeredness is a key value

So far we've learned...

Self-management support

- Knowledge
- Self-efficacy
- Empowerment
- Activation
- Engagement

= Patient-Centeredness

Next steps

- Conduct final evaluation
- Identify best practices
- Develop tools to support change
- Spread learning through transformation initiatives
