OPHA Statement on Coronavirus

The Oregon Public Health Association calls on Oregon leaders to enact stricter physical distancing measures, such as a shelter-in-place order, to slow the spread of the Coronavirus. In addition, we should make every effort to expand testing for Coronavirus, so that we know how much the virus has spread. We must also consider the economic needs of all Oregon residents, with a focus on populations most impacted by this crisis. We support leaders taking action against Coronavirus, with an understanding of, and compassion for, their residents.

Contact OPHA Executive Director Jessica Nischik-Long with questions.
