## ACTION ALERT

### **Oregon: Don't Let Them Block Paid Sick Time**

**Join OPHA and Family Forward Action in support of a statewide paid sick time law now!**

Dear OPHA Member,

You know what would really help move the paid sick days bill forward in our state capitol? Pressure. Pressure on the few legislators who are standing in our way. And what pressure looks like is us lobbying in the capitol AND you pushing from outside the state capitol. That's the powerful combination it will take to win paid sick days for Oregon.

You're right, it shouldn't be this hard. But there are a few key decision makers willing to stand in the way of progress, even though it's crystal clear that paid sick time benefits us all: workers, employers, kids, parents, public health, teachers, our communities, and our state's economy.

We're determined to convince them that a comprehensive, effective statewide paid sick time law is right for Oregon. **We're not giving up and we hope you won't, either.**

**Will you use your powerful voice to contact key lawmakers today?**

**Good! [Just click here to speak up for a statewide paid sick time law now!](#)**

See, if too few of us speak up now - right when legislators are considering whether to move this forward – paid sick days could be stopped by a very few legislators who don't seem to care that kids are being sent to school sick or that Oregonians are working sick because they can't afford not to, or worse, losing need income or their jobs due to routine illness.

**Don't let that happen! [Speak up today for real progress in Oregon!](#)**

Your voice really matters. When you don't use it, trust us, we are far likelier to lose the fight for Oregon women and working families.

**[Just click here now](#)** (before it falls off your radar!) to put the pressure on for paid sick time for ALL Oregonians. Use YOUR VOICE to help families across the state TODAY! We're not exaggerating when we say this is up to us to win – or lose.

Thank you. We can do this — if we put the pressure on right now.
